

Daniel Hüsler

Daniel Hüsler
Head of Technology

«Our hardwork pays off and the statistics prove it: You will land on the fairway more often and with a lot more fun.»

With over 20 years of experience in carbon engineering and production, Daniel is an expert in his field. He is the mastermind behind the foundation of Golfyr.

An idea from material science for a revolution in golf. A lightweight carbon construction that makes the ball fly. As the Head of Technology and a carbon specialist, Daniel Hüsler has delved into the advantages and challenges of carbon, and with a new manufacturing process and the liberation of today's geometry, he has developed a new era of clubs. No longer are only individual parts of the clubs made of carbon, but the entire golf set. A uniqueness. The new technology returns the complete energy of the swing, not just at the sweet spot but across the entire surface. Additionally, the clubs excel in optimal forgiveness. This saves players' strokes and brings a lot of joy to the game.

- CEO adultimum AG (Carbon automation company)
- CEO BIONTEC (Company for molded components from embroidery technology)
- Head of Composite Process Development Esoro AG
- Master in Materials Science, ETH, Zurich
